

# Protexpaint

## Description

Water-based stain protector for interiors, colorless and opaque, based on particular binders in aqueous dispersion, transparent pigments and special additives which provide high surface protection capabilities. Easy to apply, it can slightly alter the initial color of the product on which it is applied and considerably improves its stain removal. The “eggshell shield technology” does not allow water-soluble liquid substances to penetrate and ruin the support.

## Uses

It is particularly suitable for protecting the surface of all those wall products which, due to their composition, tend to chalk, such as water-based paints or to improve resistance to stains.

## Surface preparation

Ensure that the substrate is perfectly dry. Wait for at least 48 hours from the application of the last coat of paint.

## Application

Apply two coats of PROTEXPAINT with a brush or short-haired roller. Apply in such a way as to perfectly wet the surface to optimize the final protection, but taking care to spread the product perfectly and uniformly. It is essential to apply two coats and wait for the film to dry completely to obtain a uniform finish.

**Do not apply on breathable or low binder content products.**

**Mix well and repeatedly before and during use.**

## Dilution

Add 0-5% water (depending on the absorption of the support).

## Cleaning tools

With water immediately after use.

## Storage

24 months in sealed container, away from sources of heat, in a cool and ventilated place, protected from frost.

## Technical data

PRODUCT	Matt protective mural varnish
SPECIFIC WEIGHT	0,980 ± 0,050 kg/l
VISCOSITY	290 ± 10 cP Brookfield at 23°C
GLOSS	10 ± 0,5 g.u. (85°)
COLOUR	Transparent
RECOMMENDED THICKNESS	10-20 dry µm for each coat
RECOMMENDED COATS	2 coats
RECOAT TIME	8-10 hours
APPLICATION METHOD	Brush, roller
THEORETICAL YIELD	12-15 m <sup>2</sup> /l for 1 coat
TOUCH-DRY (23°C)	1-2 hours
DEEP-DRY (23°C)	24-36 hours

### REV 1/2023

The aforementioned technical notions regarding the application and correct use of the product do not imply liability of Alcas Italia S.r.l. for use and application of the products themselves. Due to the unpredictable variability of application conditions, the USER must verify with direct tests the suitability of the product for each peculiar use. We reserve the right to modify the content of this document, without notification. As soon as a new version of these technical data sheet becomes available, this one won't be valid any longer.
