

# I COLORI DEL MEDITERRANEO

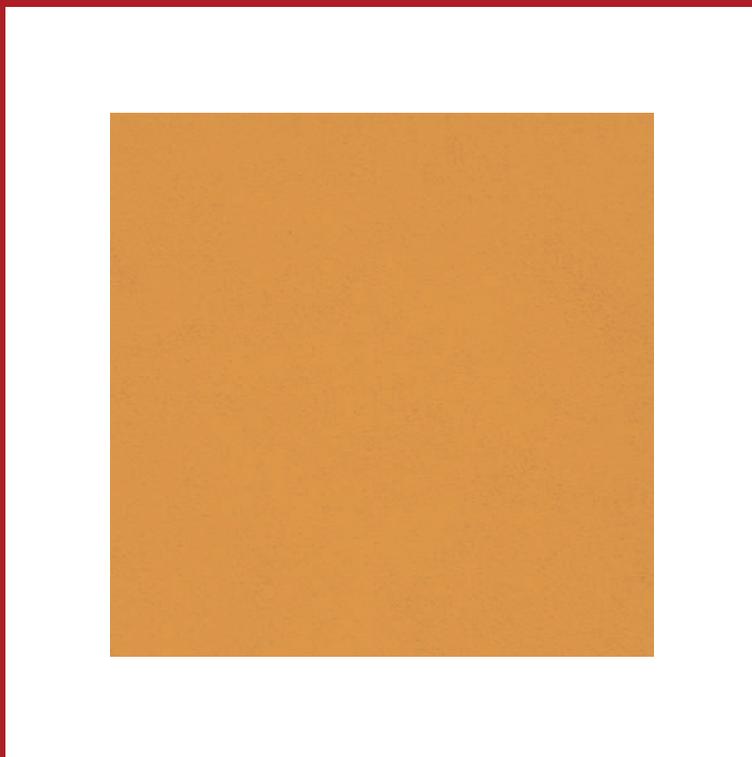

SELEZIONE DI TINTE PER ESTERNI

# TINTE PER ESTERNI

## SUGGERZIONI

## SENZA TEMPO

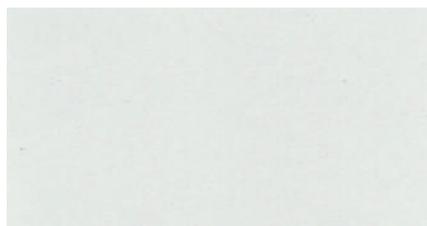

Esplora la cartella prodotti di tinte per esterni, ispirate ai colori senza tempo del Mediterraneo. Dalle tonalità calde del terracotta alle sfumature serene del turchese, ogni colore cattura l'essenza della regione, regalando suggestioni che trasformano gli spazi esterni in scenari di bellezza autentica. Resistenza alle intemperie e qualità superiore si fondono con la tradizione mediterranea per creare una palette di colori unica.

Explore the product catalog of exterior paints, inspired by the timeless colors of the Mediterranean. From the warm tones of terracotta to the serene shades of turquoise, each color captures the essence of the region, offering suggestions that transform outdoor spaces into scenes of authentic beauty. Weather resistance and superior quality blend with Mediterranean tradition to create a unique color palette.

## ALCAQUARZ

Pittura al quarzo fine per esterni con elevata resistenza agli agenti atmosferici e potere riempitivo, traspirabilità e resistenza al lavaggio ottimali. Aspetto opaco e omogeneo, ideale per mascherare imperfezioni. Granulometria massima: 0,05 mm. Adatta a edifici antichi e stabili nuovi suintonaci a base di calce e cemento.

Fine exterior quartz paint with high resistance to weathering and optimal filling power, breathability, and wash resistance. Matte and uniform appearance, ideal for concealing imperfections. Maximum particle size: 0,05 mm. Suitable for both old buildings and new structures with lime and cement-based plaster.

## QUARZO PAINT

Pittura al quarzo fine per esterni, caratterizzata da ottima adesione e resistenza alle sollecitazioni meteoriche, oltre ad un'eccezionale bianchezza. Opaco e di aspetto omogeneo, si distingue per la facile applicabilità e la buona copertura che, insieme all'elevata resistenza alla formazione di alghe e muffe, ne fanno il prodotto ideale per tutti i tipi di intonaci civili che necessitano della giusta protezione insieme al gradevole aspetto estetico.

Fine quartz paint for exteriors, characterized by excellent adhesion and resistance to meteoric stress, further exceptional whiteness. Opaque and homogeneous in appearance, it stands out for its easy applicability and good coverage which, together with the high resistance to the formation of algae and mold, make it the ideal product for all types of civil plasters that need the right protection along with the pleasing appearance.

## ACRISOL

Pittura acril-silossanica al quarzo ultra fine. Grazie alla spiccata resistenza alle aggressioni chimiche, all'ottima traspirabilità e alla riluttanza alla formazione di alghe e muffe, ne fanno il riferimento qualitativo delle tradizionali idropitture per esterni. Ideale per tutti quei manufatti che richiedono un alto standard estetico in quanto oltre alla sottile finitura, la componente silossanica impartisce al film applicato una bassa presa di sporco e idrorepellenza, e quindi garantisce tinte inalterate nel tempo.

Ultra-fine quartz acrylic-siloxane paint. Thanks to the strong resistance to chemical aggression, excellent perspirability and reluctance to the formation of algae and molds, make it the qualitative reference of traditional outdoor water paints. Ideal for all those artifacts that require a high aesthetic standard as in addition to the thin finish, the siloxane component imparts a low dirtying and water repellency to the applied film, and therefore it guarantees unchanging colors over time.

## ALKELASTIC

Pittura alla farina di quarzo, riempitiva, opaca, a base di speciali resine elastomeriche, pigmenti e cariche selezionate che conferiscono al prodotto ottime proprietà di dilatazione ed impermeabilizzazione. Permette una buona diffusione del vapore acqueo unita ad una elevata resistenza agli agenti atmosferici ed agli sbalzi termici. Presenta un buon potere uniformante e riempitivo e crea un ponte elastico sulle screpolature evitando infiltrazioni di acqua e anidride carbonica.

Quartz flour paint, filler, matt, based on special elastomeric resins, pigments and selected fillers which give the product excellent expansion and waterproofing properties. It allows good diffusion of water vapor combined with high resistance to atmospheric agents and temperature changes. It has good leveling and filling power and creates an elastic bridge over cracks, avoiding infiltrations of water and carbon dioxide.
