

Frammenti d'argento

Description

Special toner based on fine silver powders, with excellent colourfastness and brightness. Added to products such as paints and decorative coatings, it provides a bright, shiny surface finish thanks to the metallic particles contained in the formulation.

Uses

For the extraordinary sparkling effect, it is particularly indicated for decorating interior surfaces of flats, villas, hotels and any other environment requiring unique finishes and plays of light.

Application

FRAMMENTI D'ARGENTO can be poured directly into products with moderate viscosity (such as emulsion paints and decorative coatings), taking care to mix adequately.

Apply at temperatures between 5°C and 30°C. Do not apply on hot or ice-cold surfaces, in presence of strong ventilation, in environments with high relative humidity.

Dilution

Ready to use. Stir exclusively by hand before use.

Cleaning tools

With water immediately after use.

Storage

24 months in sealed container, away from sources of heat, in a cool and ventilated place, protected from frost.
